What you want before you need it.

Discover New Ways of Working

What do workspaces need today?
How are the demands and needs of people changing in our time?

Adapt to Work in Shared Spaces
The rise of hybrid and remote work models has reduced office occupancy while increasing the demand for shared office solutions in smaller spaces.

The Age of Meetings
Recent data shows that 83.13% of employees spend up to one-third of their week in meetings. Nearly half of them spend more than an hour, and 22.5% spend over two hours per session. This intense schedule drives the need for well-equipped, multi-purpose meeting areas in offices.

Need for Privacy
Constant exposure to noise makes it difficult for employees to stay focused and motivated. Calma provides quiet and comfortable spaces in shared offices for short breaks, privacy, or moments that require full concentration.

Adaptation to Working in Shared Spaces
Designed to adapt to the new generation of work culture, Calma combines modular structure, high acoustic performance, and mobility to offer an aesthetic and functional solution for personal space needs in any shared workspace.

Calma Acoustic Spaces

Engineered to create the perfect working conditions,
Calma preserves your health and well-being throughout long working hours.

The perfect proportion of a regular meeting room, Calma spaces provide **up to 17 times* better** air circulation within your workspace.

Calma pods uses **2700K**, dimmable ambient lights, aligning closer with **natural circadian rhythms**.

15+

With high engineering standards and carefully selected materials, Calma holds **more than 15 international certifications.**

*These figures are based on evaluating Calma Small and Calma For U with ventilation fans operating at 100% capacity.

ISO
23351-1

Exposure to sound pollution can cause stress related cardiovascular disorders and make it harder to focus. A quick escape from noise, Calma creates the perfect space with **Class A Soundproofing, certified by ISO 23351-1.**

Ideal voice clarity is developed with the specially engineered multilayer acoustic system of Calma **to achieve 0,30 sec of reverberation time.** Allowing voices and sounds to be perceived clearly within the space.

Constantly tested and re-developed within Nurus' in-house Acoustic Lab, materials used to create Calma set new standards. Unlike others; Calma ensures **a balanced blockage of both low and high-frequency sounds.** This ongoing R&D makes Calma a leader in setting new benchmarks for the industry.

Calma

We Care About the Air You Breathe

Air Exchange Rate per hour up to 106x

CERTIFIED INDOOR AIR QUALITY SCS GLOBAL SERVICES

All materials used in Calma acoustic pods are free from volatile organic compounds **(VOCs) and harmful chemicals**. Substances such as xylene, formaldehyde, acetone, chloroform, benzene, and toluene are completely excluded. Ensuring clean, safe air inside for long hours.

Engineered to maintain constant fresh air circulation, The CO_2 level inside remains **below 1000 ppm** with air refreshed **up to 106 times per hour***, offering **up to 17 times better air circulation than a standard meeting room.** Fan power can be easily adjusted through the integrated touchscreen inside the pod.
Additionally, during the order phase, the dual ventilation system can be configured to direct airflow from either the upper or lower vents.

*These figures are based on evaluating Calma For U with ventilation fans, operating at 100% capacity.

Calma

Reducing Stress is More Important Than Ever

Have you experienced visual strain lately?
Long hours of exposure to light can cause **chronic headaches** and distractions.

Calma uses the closest possible light temperature and brightness to **a calming sunset (2700K)**. Using warm light amplifies Calma's affects on well-being, aligning closer with **circadian rhythms** and preferences.

Engineered and carefully calculated lighting distribution ensures that everyone in the meeting has **enough light to work** and look their best during long hours of meetings or focus group work.

Calma

Create Perfect Workspace Conditions

Stay seamlessly connected with **Calma's toughtful design,** featuring convenient Links modules with multi-national sockets, USB ports, and HDMI connections within the pod. Constant secure and stable connections with Media Wall, Links modules, and high quality electrification & lighting components **ensures you look your best at all times.**

Providing one of the best video conference performances, Calma Z & Z2's Media Wall integration is engineered for creating the optimal workspace and **digital communication experience.**

Media Wall is an optional integration, only available for Calma Z.

A standard media wall includes:

1 Links Unit that contains:
2 pcs 220-240 VAC power socket
(Max Output Power 750W)
    1 pc USB A+C charger
    1 pc RJ45 Ethernet data sockets

2 units of Dimmeable Facelights:
Optimised digital communication,
    controlled by the integrated
    touch panel of Calma Z.

Behind the screen there are
2standard connections:
    1pc 220-240 VAC power socket
    (for mounting screen)
    HDMI cable tunnel for TV integration

Please note that a TV, Screen or Monitor is not included or attached to the media wall unit.

Maximum 27 inch screens can be mounted on the Media Wall unit. The electrification unit shown on the visual is Multinational Type.

Following Socket Types are supported for Calma:
Multinational (Universal Common Sockets except Switzerland), Schuko (EUR), UK,
US (NEMA 5-15R, USA & CANADA)

*Calma Large, X Large or XX Large with optional screen bracket: While USB-C remains, the USB-A entry is removed and replaced with an HDMI socket. 1 socket for TV and 1 HDMI cable tunnel will be added on the panel for TV integration.
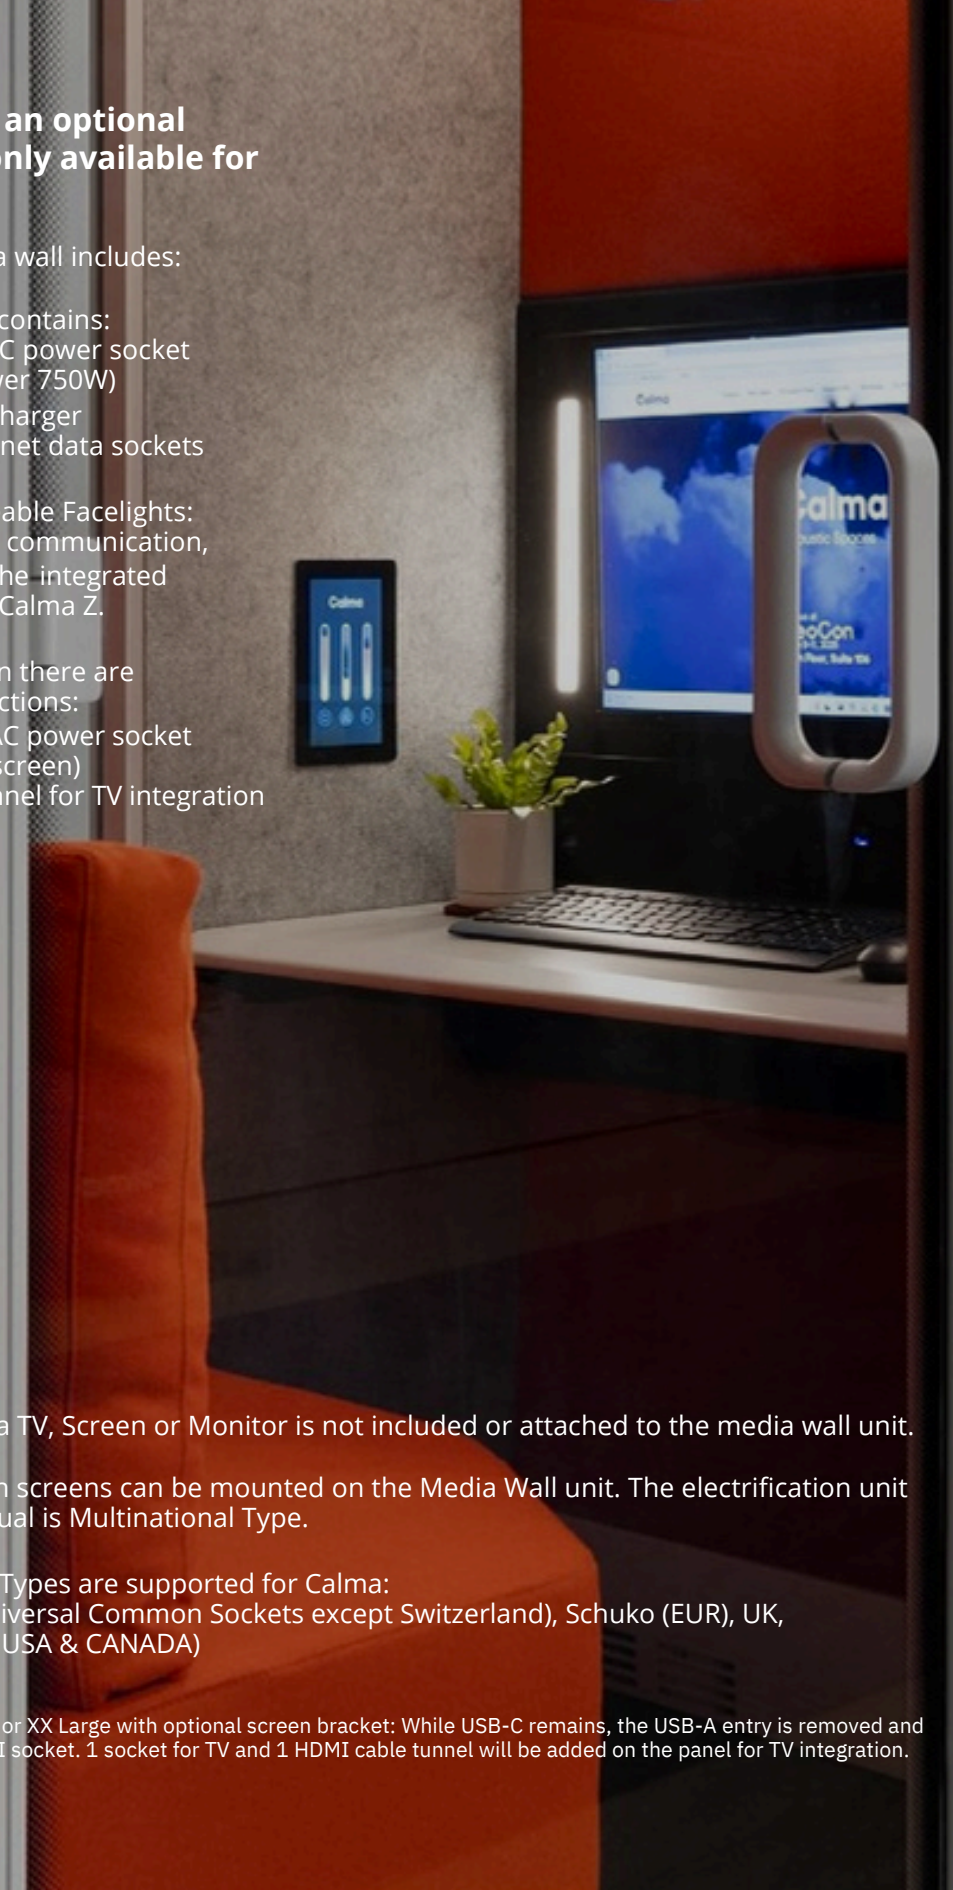

Calma

Workspaces are
Organic Environments

Calma spaces, up to Large, have castors to help easily relocate. Built upon its floor plate like legos, **the modular components of Calma are easily assembled and installed.**

All finishes and materials of Calma pods are selected in neutral shades for blending in perfectly with the surrounding environment. **Calma supports any sudden changes needed in office layouts,** and safety is always paramount with seismic foot plates, **providing stability and security** in the rare event of earthquakes.

Calma

We Are
The Supply Chain

All Calma spaces are crafted within Nurus' extensive **45,000 sqm technology base with 95% vertical integration and a century of expertise.**

Every step of production is meticulously tracked, ensuring reliability and resilience against external influences. This **fully in-house, circular system** not only guarantees superior product quality but also **significantly reduces Scope 3 Carbon Footprint, setting a new standard in the industry.**

With headquarters in Ankara and warehouses in Germany and North America, Calma products are delivered punctually through our **extensive distribution network,** ensuring safe and timely delivery to our **45+ global sales points,** every time.

Calma

Calma: Built to Sustain, Committed to Health

Calma pods are made with 100% solar energy and our unwavering dedication to sustainability.

"Calma exemplifies commitment to environmental sustainability through its efficient, innovative manufacturing processes and use of eco-friendly materials. Manufactured within a 95% vertically integrated facility, the circular production system minimizes Scope 3 Carbon emissions."

Calma pods are crafted using a zero-waste, HDF powder coating prorcess, which eliminates any VOC (organic and inorganic) emissions and results in a fine-grained, antibacterial surface that is easy to clean and maintain. This process also uses lower heat (130-140°C) for curing a thermoset, durable surface, reducing energy consumption compared to traditional methods.

Calma's structure incorporates responsibly sourced materials, including FSC certified wood, and 50% recycled PET felt.

Calma holds multiple certifications, including Indoor Air Quality Gold, supported using Basotect G+ layers instead of conventional stone-wool insulations, enhancing both acoustic performance and environmental sustainability. Additionally, Calma's packaging is made from 100% recyclable materials, further minimizing its environmental impact.

Calma holds an Environmental Product Declaration (EPD) certification, which objectively analyzes and evaluates its environmental impacts. Prepared in accordance with ISO 14025 and ISO 15804 standards, this declaration serves as a document that scientifically and comprehensively analyzes the environmental impacts of the product throughout its life cycle.

By integrating sustainable manufacturing techniques, renewable energy sources, and recyclable components, Calma For U sets a new standard for sustainable workplace solutions. It not only meets but exceeds current environmental standards, making it an excellent choice for organizations committed to sustainability.

Calma

Good Products
Choose Their Own Material

Calma is layered with **Basotect G+** for superior soundproofing and Indoor Air Quality. Coated with industry-leading HDF powder coating technology, Calma ensures **a durable, healthy, and sustainable life cycle** with very low VOC emissions, supporting a sustainable life cycle.

Basotect G+

Calma integrates Basotect® G+, a lightweight melamine foam combining exceptional sound absorption with minimal material use. Its **durability, low density and ultra-low VOC emissions** make it the smart choice for healthier interiors and efficient resource use, perfectly aligned with Calma's sustainability vision.

HDF Powder Coating

Using HDF powder coating, Calma enhances durability and moisture resistance while providing a smooth finish. HDF powder coatings are **virtually VOC-free and cure at lower temperatures, helping to reduce energy consumption.** By combining durability with ultra-low VOC performance, this technology supports **healthier indoor spaces and Calma's commitment**

to sustainability.

12 mm tempered glass door and 5+5 mm laminated glass with PVB acoustic interlayer windows.

12. Full Length Meeting Table
200 cm long meeting table for large gatherings.

13. Coat Hangers
Two coat hangers positioned between the two fabric panels.

14. Optional Housing for Sprinklers
A Ø54 mm housing can be opened on the ceiling.

Actually, Six Isn't A Crowd

The ideal workspace for large gatherings, Calma Pro provides a highly customizable meeting space for your teams.

32-inch TV Screen Bracket

These screens provide ample viewing space for presentations, video conferences, and group work, while being of a size that can be placed harmoniously without disrupting the room's aesthetics.

Collaborate with Different Disciplines

Whether brainstorming, developing a project or just jamming, Calma allows you to form deeper connections with colleagues to find better solutions – together.

Easy Installation

Straight forward and simple, Calma's assembly and installation is as easy at stacking blocks on top of one another. All Pods are shipped in 100% recyclable packaging and wooden crates.

Adjustable Lighting

With adjustable ventilation and dimmable lights, Calma gives you ongoing control over your workspace.

Multi-national Electrification Module

Stay seamlessly connected with Calma's thoughtful design. Practical Links modules, multi-national electrification module, USB ports, and HDMI connections within the cabin ensure a secure and stable connection at all times.

Customization

Calma pods offer different fabric and color options. Accordingly, users can choose colors that suit their own style, allowing them to personalize their workspace in an aesthetic and functional way.

13. Coat Hangers
Two coat hangers positioned between the two fabric panels.

14. Optional Housing for Sprinklers
A Ø54 mm housing can be opened on the ceiling.

The Collaborative Collective

With wheelchair-friendly design and interactive tools, this fluid, idea-first environment ensures everyone has a seat at the table.
All The Space You Need for Circular Motion

Calma For All's thoughtfully designed interior, with its automatically folding features and spacious layout, facilitates circular wheelchair movement. Its design aligns with the guidance provided in 2010 ADA Standards for Accessible Design, Section 304.3.1, regarding circular turning spaces.

Door Closing Mechanism

Calma For All features a mechanism for closing its door, designed to enhance accessibility. The door closes softly once the applied pressure is released.

Lighting and Ventilation

With adjustable ventilation and dimmable lights, Calma gives you the feeling of always having control over your workspace.

Easy Installation

Straight forward and simple, Calma's assembly and installation is as easy at stacking blocks on top of one another. All Pods are shipped in 100% recyclable packaging and wooden crates.

Foldable Bulit-in Features

Foldable seats return to their upright (closed) position when not in use, and fold down when someone sits. The table folds manually when needed.

Calma Recommendations

Please follow the recommendations and guides when using, installing, or moving Calma for best results.

- Do not plug in appliances more than 220-230 VAC.
- Make sure that Calma is not plugged before you open the access cover on top.
- The ventilation and lights work at the same time. Make sure the lights are on when you are in the pod.
- Do not block the vent grill, keep 20 cm distances between Calma products and walls.
- Do not smoke inside.
- To have better access to air, we also recommend having at least 20 cm space distance between the ceiling and pod.
- Keep the door closed at all times.
- Keep fire sources away from Calma at all times.
- **Do not install high power-consuming devices such as heaters or vacuum cleaners inside Calma.**
- The maximum power outlet capacity is 750W for standard Calma.
