TABLE

CONSTRUCTION

Durable metal frame and carefully selected materials with the high sound **insulation and soundproofing** properties.

The construction on 4 wheels. Wheels with thermoplastic polyurethane tread and anti-fiber cover. Two wheels with a blocking option.

Optional construction on feet, closed with a plinth, powder painted in the colour of the frame.

ACOUSTICS

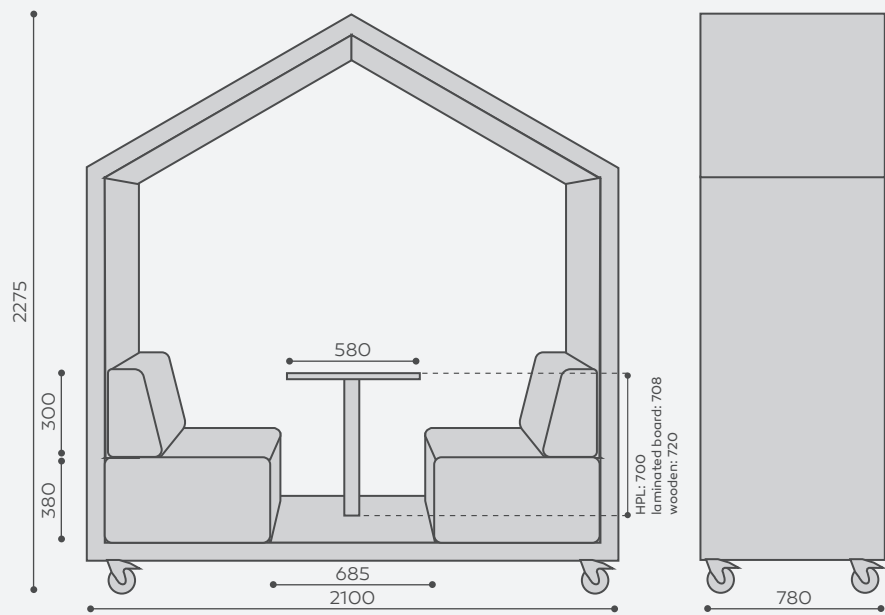

The version upholstered outside improves the acoustic conditions in the room, **reducing reverberation**.

MEDIA PORT

Optional **media port with 230V socket** (type E – Poland, France; type F – Germany; type G – Great Britain), **HDMI and 2x USB**. Included (with media port) cable (length 1 m) (plug: type E – Poland, France; type F – Germany; type G – United Kingdom).

Detailed information on standard/optional equipment can be found in the price list.

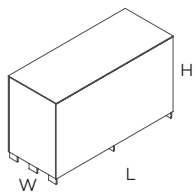

TECHNICAL DATA

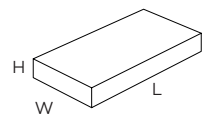

Dimensions are expressed in millimetres. Dimensions are approximate and may vary depending on the selected product configuration. The requirements of the standard are always fulfilled.

The product sheet contains a description of the colour options, variants of the wall, floor and panels finishes, as well as the furnishing components possible to be installed.

THE CHANGES WE'VE MADE

BEFORE

NOW

MULTIMEDIA PANEL

We replaced the metal MF frame with a multimedia panel to hide all cables coming out of the media port and TV. The multimedia panel can be made of laminated board, HPL or upholstered in fabric of internal or external panels.

BEFORE

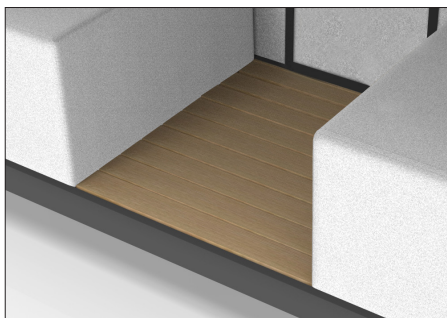

NOW

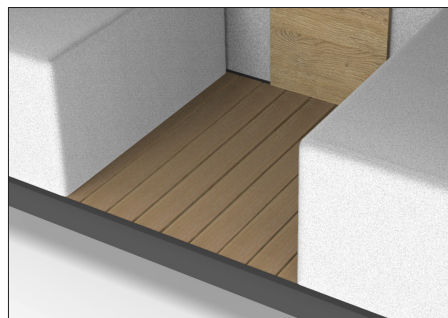

BACK WALL

By replacing the metal frame with a multimedia panel, the back wall has changed. We have also added a metal frame, thanks to which the back is coherent with the front.

BEFORE

NOW

FLOOR

We have improved the direction of the wood grain on the floor so that the whole collection of TH booths acquires a coherent and harmonized look.
